

The UAAACT Policy and Procedures Manual was prepared by members of The UAAACT Project, with support from the Utah State Office of Education, Students At Risk Section.

Many past members of the UAAACT Leadership Council have worked to develop the guidelines in this manual. Individuals who supported the 2003 revision of the manual with their experience, wisdom, and time include:

Julie Brown, Jordan School District

Janice Hill, Weber School District

David John, Uintah School District

Tammy Miller, Utah Schools for the Deaf and the Blind

Jim Payant, Cache School District

Trish Smith, North Sanpete School District

Judy Roberts, Jordan School District

Jocelyn Taylor, Utah State Office of Education, Students At Risk Section

Christine Warnick, North Summit School District

Jim West, Davis School District

Mellowdee Brooks, The Computer Center for Citizens With Disabilities

Craig Boogaard, The Computer Center for Citizens With Disabilities

Requests for copies of this manual in alternative formats may be directed to:

Craig Boogaard

The Computer Center for Citizens With Disabilities

1595 West 500 South

Salt Lake City, UT 84104

Phone: 801-887-9380

Fax: 801-887-9382

E-mail: cboogaar@utah.gov

The UAAACT Leadership Council will review annually and amend this policy manual as needed.

Utah Augmentative, Alternative, Assistive, Communication and Technology Teams Policy and Procedures Manual

The Utah Augmentative, Alternative, Assistive, Communication and Technology (UAAACT) Teams serve as a resource for assessment and development of communication and technology systems for students who are nonspeaking or severely limited in their quality of speech or written language. UAAACT Teams have been established for the purpose of assessing student communication needs and for providing consultation to IEP teams for ongoing programming. They do not provide direct services or therapy.

When a student receives an assistive technology assessment from a UAAACT team, the UAAACT team will provide the IEP team with the results of the assessment. However, the **decision** about what assistive technology devices and services a student requires and how they are included in the IEP is the responsibility of the IEP team.

U= Utah – a state in the western United States

A= Augmentative - to make greater, enlarge, increase

A= Alternative - two or more possibilities

A= Assistive - to aid or help

C= Communication - exchange of thoughts, messages or information

T= Technology - the application of science

The following policies and procedures define services provided by the UAAACT teams to students with disabilities aged 3-21 in the State of Utah.

I. District Responsibilities and Benefits

A. District Responsibilities

School Districts Support the UAAACT project by:

1. Appointing special education staff members to serve on the local UAAACT team and provide released time for appointed individuals to participate in UAAACT activities (At least 2 days per month are recommended). See “Sample Letter” in appendix. UAAACT activities could include conducting student assessments and follow-up sessions, attending training, report writing, etc.
2. Providing released time for Leadership Council members to attend council meetings
3. Providing substitutes when needed.
4. Reimbursing UAAACT members mileage for travel to and from student evaluations and follow-up sessions
5. Allowing time for report writing.
6. Assisting with the repair of team equipment above and beyond UAAACT allocations

B. Benefits for School Districts

The UAAACT Teams support School Districts by:

1. Providing a multi-disciplinary team to conduct evaluations of students in their own environment. There is no cost to districts that have a participating UAAACT member.
2. Conducting follow-up services for students previously evaluated.
3. Providing access to equipment in the UAAACT equipment inventories.
4. Preparing written reports of students evaluated.
5. Providing local, regional and national training opportunities for UAAACT team members.
6. Encouraging and preparing UAAACT members to provide training to district personnel regarding use of augmentative equipment and assistive technology.
7. Planning an augmentative communication conference every other year for UAAACT members, parents and other professionals.
8. Providing access to regional and national augmentative communication and assistive technology specialists.

II. Roles and Responsibilities

A. Utah State Office of Education Representative

1. Provide suggestions and guidance to the Leadership Council
2. Serve as a liaison between the Utah State Office of Education and the UAAACT Leadership Council
3. Serve as a liaison between Special Education Directors and the UAAACT project

B. Computer Center for Citizens With Disabilities (CCCD) Staff

1. Provide Training and support to UAAACT Team members
2. Assist with assessments when requested by UAAACT Teams
3. Suggest equipment purchases for central inventory and team inventories
4. Check UAAACT equipment in and out, repair and maintain items in the UAAACT lending library, and order new items approved by the UAAACT Leadership Council
5. Conduct assistive technology consultations for students with disabilities and inform UAAACT teams of consultation results
6. Support parents and students who are working with UAAACT teams by providing training and equipment troubleshooting services
7. Assist in writing the UAAACT grant

C. UAAACT Leadership Council

1. **Chairperson**

- a. Serves as contact person with the USOE liaison, district special education directors, and UAAACT Leadership Council members
- b. Oversee all assignments made to council members
- c. Conducts/oversees council meetings
- d. Prepares UAAACT Leadership Council agendas
- e. Assists in writing the UAAACT grant
- f. Works to achieve or maintain Competency Level III and supports UAAACT members in improving their assessment and technology skills

2. **Council Members**

- a. Review and update UAAACT Policies and Procedures Manual as needed
- b. Approve equipment purchases and repair of UAAACT equipment
- c. Publish a UAAACT newsletter
- d. Collect contact hours and prepare service reports
- e. Assist with conference and training planning
- f. Deal with budget issues
- g. Disseminate information to assigned teams
- h. Work to achieve or maintain Competency Level III and supports UAAACT members in improving their assessment and technology skills.

Note: UAAACT Leadership Council Members will be eligible to attend a major technology conference during their two-year term as a council member. The Council Chairperson will be eligible to attend one additional conference. Approved expenses related to attending the conferences will be paid by the UAAACT project.

D. Team Leader

1. Lead and administer the UAAACT Team program
2. Facilitate student assessments by receiving referrals and assigning a case manager
3. Delegate critical team responsibilities:
 - a. Scheduling student evaluations and follow-up sessions
 - b. Tracking student records and reports
 - c. Collecting, organizing, and reporting services provided to the UAAACT Leadership Council each year
 - d. Managing and accounting for team equipment
 - e. Conducting district workshops, technical assistance, and support to IEP teams
4. Communicate with the Leadership Council member serving their area, keeping informed of Utah State Office of Education and Leadership Council initiatives
5. Participate as a team member
6. Notify the Leadership Council of team vacancies or new team members
7. Prepare an annual team training plan (see “UAAACT Travel Policy” in appendix)
8. Conduct positive public relations with district administrators in the team area
9. Work to achieve or maintain Competency Level III and support team members in improving their assistive technology assessment skills.

Note: Team Leaders will be eligible to attend a major technology conference (usually CSUN) every other year during their service as a team leader. The team leader may delegate attendance at the technology conference to another team member if the team leader is unable to attend the conference, or if the team leader feels having another team member attend the conference would serve to improve the overall skills of the team.

E. Team Members

1. Participate with other team members in conducting skillful assessments of students who may benefit from assistive technology devices or services.
2. Follow district procedures in obtaining permission to participate in evaluations, follow-up sessions and training activities
3. Actively demonstrate team commitment in the areas of attendance, punctuality, dependability, and completion of task, i.e., reports, status notes, communication, contributing throughout the assessment and follow-up process
4. Follow established district and team procedures
5. Communicate with team leader, other team members and professionals involved with students who are served
6. Promote a positive image of the UAAACT Project
7. Promote teaming strategies
8. Perform duties as assigned by the team leader
9. Work to achieve and maintain Competency Level II or III as outlined in the appendix.

III. Selection/Removal of Members

A. Selection of Leadership Council

1. Each of the five established UAAACT regions will be represented by a UAAACT Leadership Council member. On a rotating basis, each team in the region will have an opportunity to select a team member who will represent the region.
2. Each council member must have approval from his/her district administration to serve on the Leadership Council
3. Each council member will serve a two-year term. The council chairperson may serve an advisory role for an additional year if approved to do so by his/her district administration.

B. Selection of Team Leaders

1. Team Leaders are selected by their team members or appointed by their district special education director or directors in the team area
2. When it becomes necessary to select a new team leader, the leadership council would suggest that, if possible, the new team leader be a team member with Level III competencies.

C. Selection and Removal of Team Members

1. **Selecting New Team Members**

- a. New team members are selected by their district special education director, usually after consulting with the team leader.
- b. The special education director writes a letter (or email) in support of the individual selected as a new team member to the leadership council. Please use the "Sample Letter" in appendix to insure the necessary information is provided to the leadership council.
- c. A variety of disciplines should be represented on the team. It is strongly recommended that each team have a speech therapist, a special education teacher and a motor specialist (OT or PT).
- d. Teams consist of, but are not limited to, speech therapists, special education teachers, regular classroom teachers, psychologists, occupational therapists, physical therapists, administrators, computer specialists, audiologists and vision specialists
- e. Teams should generally consist of five to six members
- f. Specialists may be invited to serve as temporary UAAACT team members if their expertise is needed in a particular student evaluation. For example, if a student with a vision impairment was referred to the UAAACT team for evaluation and that team did not have a vision specialist on the team, a vision specialist from the school district or from the Utah Schools for the Deaf and the Blind may join the UAAACT team for the evaluation of that student.

2. **Removal of a Team Member**

A member may be removed from a UAAACT team at the discretion of the special education director, in consultation with the team leader, for the following reasons:

1. A change in their work assignment that prohibits further participation on the UAAACT team
2. Low attendance at UAAACT events
3. Failure to complete assignments
4. Failure to progress toward level II certification
5. Failure to demonstrate active commitment to the team

IV. Student Assessment Procedures

Step 1 - Obtain Referral Packet

1. The school staffing team will provide the special education director/designee with the following referral information:
 - A. Copy of permission to evaluate (may use school district "Permission to Evaluate" form but indicate UAAACT assessment in some way)
 - B. Completed UAAACT referral form (see "Referral Form" in Forms Section)
 - C. Most recent staffing information
 - D. Most recent reports in the areas below:
 1. cognitive ability
 2. functional academic skills
 3. language and communication skills
 4. independent living skills
 5. motor development
 - E. Current IEP/IHP.
 - F. Other pertinent information
2. Information for referral is sent to the special education director/designee
3. Special education director/designee sends referral packet to UAAACT team leader or case manager
4. UAAACT referrals are prioritized at the district level

Step 2 - Initial Contact (see "UAAACT Evaluation Check List" in Forms Section)

1. Team leader assigns a case manager from among the UAAACT team members, preferably a team member from the school district where the student attends school.
2. Case manager begins a log of contacts
3. Case manager contacts principal, teacher and referral source in person or by phone as appropriate to facilitate the initial evaluation
4. Case manager will acquaint the teacher of the student who has been referred for a UAAACT evaluation with the evaluation process

Step 3 - Team Planning

1. The team leader and case manager will determine the composition of the UAAACT evaluation team and ensure team members who will be participating in the evaluation have the essential information regarding the student prior to the assessment. Note: Not all UAAACT team members need to participate in every evaluation, but every evaluation should be conducted by an appropriate multi-disciplinary team. For example, if it is known that the student to be evaluated has normal vision and hearing and there is an audiologist or a vision specialist on the team, the audiologist or vision specialist may be excused from this particular evaluation. Similarly, if the UAAACT team does not have an audiologist on the team, but the student appears to have some hearing loss, it is suggested that the UAAACT team invite an audiologist to serve as a temporary UAAACT member for that particular assessment. CCCD staff members are often available to join in the evaluation process if requested. Also, evaluations may be conducted at CCCD if the UAAACT team determines that it is not necessary to conduct the evaluation at the student's school.
2. A team meeting, conference phone call, or email by the team leader or case manager is held prior to the assessment to:
 - a. Determine needs and decide types of assessment needed
 - b. Determine each team member's role
 - c. Decide what equipment/materials will be needed and who will transport these items
 - d. Decide the date of the initial evaluation and set a schedule for the day.
 - e. Arrange transportation of team members if necessary
 - f. Discuss parent involvement at the initial evaluation
 - g. Case manager outlines what additional information is needed and coordinates initial visit
 - h. Arrange back-up plan in case of snow, illness, etc.

Step 4 - Scheduling

1. Case manager makes second call to the student's teacher to:
 - a. Request any additional information
 - b. Schedule visit
 - c. Confirm date and time
 - d. Arrange location/space within the student's school for the assessment and trial use of equipment
 - e. Clarify what will occur during the evaluation and who will participate
2. Case manager or designee calls parent/guardian to:
 - a. Invite them to the evaluation
 - b. Inform them of assessment time and place
 - c. Become acquainted with the parent
 - d. Begin positive public relations
 - e. Obtain information, as necessary

Step 5 - Confirm Evaluation Appointment

1. Two or three days prior to the scheduled assessment, the case manager confirms the date with the student's teacher and parent

Step 6 - Assessment Conducted

1. A brief (15 to 20 minute) on site UAAACT Team Meeting (UAAACT Team members only) before evaluation to:
 - a. Set the schedule for the day
 - b. Review student information, IEP, recent testing
 - c. Confirm assessment tools have arrived
 - d. Assign UAAACT team member to conduct classroom observation of student, parent interview, teacher interview, provide computer and equipment setup, make status notes
2. Conduct Student observation with appropriate data collection (see data collection forms in Forms Section)
3. Interview parents (see “Parent Interview” form in Forms Section)
4. Interview teachers and other appropriate members of the student’s IEP team (see “Teacher Interview” form in Forms Section)
5. Have the student try assistive technology products such as augmentative communication devices, computer software, switches or picture communication books. The goal of the assessment is to determine if assistive technology might help the student in their progress toward the goals in their IEP, or allow them to work successfully in a more inclusive environment with the use of assistive technology. (“Assistive technology devices and assistive technology services for students with disabilities may be provided as special education, related services, or, in the case of students with disabilities to be educated in regular classes, as supplementary aids and services.” Special Education Rules from the Utah State Office of Education, p.45, August 2001) Fit the technology to the user, not the user to the technology. Considered low tech solutions. Even the best electronic system needs a backup system. The backup system could be a communication book or a communication file saved on a computer disk.

Step 7 - Post Assessment Team Meeting (UAAACT Team members only at Evaluation Site)

1. Brainstorm solutions
2. Prepare status notes. Include assistive technology products the student tried, the results of each item tried, strategies and devices that might be helpful, and other ideas that may assist the student, parents or IEP team. Status notes are signed and dated by team members who participate in the evaluation.
3. Select a team member to share assessment information as outlined in Step 8 below.

Step 8- Summary Meeting with IEP Team and Parents

1. The UAAACT team shares information and explores resources and plans for implementation of assistive technology devices.
2. Provide one or more assistive technology devices for a trial use period of 30 days to three months as necessary. This could be an AAC device, computer access tool, software, switch, communication booklet, etc. that has the potential to benefit the student with their educational program. The device or devices could be items that are available at the school or UAAACT equipment you will provide on loan.
3. Provide basic instruction on how to use the assistive technology product or products the student will use during the trial use period.
4. Have a member of the IEP team sign for the equipment if you leave UAAACT equipment for trial use.

5. Schedule a follow-up visit, usually within four weeks, to provide additional training, add vocabulary to an AAC device, or review student progress.
6. Give a copy of the status notes to a member of the IEP team. The case manager keeps a copy of the status notes for the team records and to refer to when preparing the more formal written report.
7. Leave IEP team members with data collection forms and provide instructions for their use. Help them to understand that the decision regarding the student's need for assistive technology will be based on data they collect as they observe the student's use of assistive technology products. All decisions regarding a student's educational program should be data based. In collecting data, encourage the IEP team to seek evidence that will document the student's improvement in some aspect of their educational program. You may consider documenting some of the following: an increase in written or oral communication, faster acquisition of academic skills, improvement in quality, quantity, accuracy or frequency in assigned work, improved behavior, spontaneity, independence, increased persistence, or even a happier student
8. Provide the parents and members of the IEP team with the case manager's contact information and conclude the visit.

Step 9 - Reporting

1. Complete the "formal" report within two weeks of when the assessment is complete. The assessment may take several sessions over two to three months. The "formal" report is to be generated after the assessment is complete. If the evaluation continues beyond one month, a brief report on each follow-up visit should be initiated and provided to the IEP team with a copy of the brief report kept in the team file for use in preparing the more formal report at the conclusion of the evaluation.
2. Formal reports should be sent to the student's parents, a member of the student's IEP team, and a copy should be placed in the student's file. If follow-up visits are conducted after the formal report has been completed, follow-up status notes may be provided to the IEP team and kept in team files.

Step 10 - Follow-up

1. The case manager works with the team leader to schedule additional visits with the student, IEP team members, or parents
3. Determine which UAAACT team members will participate in the follow-up visit. CCCD staff members are often available to provide follow-up services.
4. The case manager maintains the log sheet, contact hours, and all records (status notes, formal report) for team
5. The case manager maintains periodic contact with the parent and the child's teacher
6. Status notes are left with the IEP team after each UAAACT team visit
7. The case manager will attend IEP meetings or IEP team meetings as necessary
8. Continue to provide follow-up services as changes in the student's needs occur

Step 11 - Public Relations Activities

Conduct ongoing public relations activities with school districts administration, school IEP team and parents. Inform them of workshops and training activities that might be helpful, share newsletter articles, invite them to assistive technology open houses hosted by the UAAACT team, make a phone call to see if the assistive technology tools are working properly, etc.

Sample Letter for New UAAACT Members

Dear UAAACT Leadership Council,

I would like to have _____ serve as a member of the UAAACT team in this area. _____ will replace _____ on the team. In support of _____'s assignment on the UAAACT team, I will provide him/her with at least one day each month where he/she will be excused from his/her regular district assignment to participate in UAAACT service including:

- attending training to become an assistive technology (AT) expert and a resource on AT issues for our district
- conducting AT evaluations for students who have been referred to the UAAACT team
- conducting follow-up service for students who have previously been evaluation for AT devices and services
- consulting with teachers and parents of students who need AT services

It is understood that _____ will continue to serve on the UAAACT team until he/she is replaced.

School Principal or Local Administrator

Special Education Director or Coordinator

New UAAACT Members contact information:

Salt Lake City, UT 84104

UAAACT Travel Policy

Training and associated travel costs are anticipated to continue as important aspects of the UAAACT project. Rapidly changing technology products, adding new team members, and the UAAACT competency based level system make ongoing training a necessity in order to meet the goals of the project.

Each year the leadership council will provide a training budget to team leaders along with a list of pre-approved training events for which UAAACT funds may be expended. The team training budget will be determined as follows: In a year in which we do NOT have a state UAAACT Conference, teams will receive \$250 for each team member at Competency Level I, \$500 for each team member at Competency Level II, and \$750 for each team member at Competency Level III. During the years that we provide a state UAAACT Conference, a major portion of the UAAACT project training budget is used to cover the cost of the conference including mileage, meals and hotel expenses for UAAACT members. Therefore, in years when a UAAACT Conference is held, teams will be eligible for 50% of their regular training budget. If UAAACT teams have exceptional training needs during UAAACT conference years, they will be able to apply to the UAAACT Leadership Council to request a training grant to cover their exceptional training needs. For funding purposes, UAAACT members' competency status will be determined by their competency level on May 20th of each year. Team leaders will develop an annual team training plan in consultation with team members. Training funds will not be expended until the Leadership Council or its designee has had an opportunity to review the team's proposed expenditure of training funds. The training plan should include the names of team members who will be attending training, the name of the training event, and the anticipated cost of each member attending training (including ground and air travel, parking, meals, lodging, and conference registration fee). If UAAACT members plan to attend a training event outside the State of Utah, they must submit a letter of support from their special education director/coordinator along with the annual team training plan.

Requests to attend Closing the Gap, CSUN, AAC in the Mountains, ATIA, and SWAAAC have generally been approved when UAAACT teams have sufficient training funds and a letter of support from their special education director. Team members may also request funding for attendance at alternative training events. Such requests should be made in writing to the leadership council and must contain a written explanation briefly outlining how the proposed training would benefit the UAAACT project and the individual team member. Prior written approval from the member's special education director is also required in such cases. Requests must be made in a timely fashion, allowing time for leadership council consideration for necessary financial arrangements. Project funds used for either generally approved or alternative training events may not exceed amounts budgeted.

Some excellent training opportunities may cost more than the team training budget allocation. Four options exist which might allow for member participation in training

events beyond the team budget. First, the member could use the maximum amount of approved UAAACT funding, making necessary arrangements for school district funds to cover additional costs. Obviously, this would require approval of the Special Education Director. Second, a team member could utilize the maximum yearly UAAACT training funds allocated, then cover additional expenses personally. Third, a team member may be able to plan training so that a portion of a conference expenses could be charged to one budget year, with the remainder of funds coming from the training budget for the next year. Fourth, if a team has an exceptional need for training, the team may apply to the UAAACT Leadership Council for additional training funds. Such unusual financial arrangements-would require leadership council approval based upon consideration of an appropriate written request.

Because the UAAACT travel budget goes through the University of Utah, all UAAACT members traveling to conferences must comply with the University of Utah reimbursement procedures. This means original hotel receipts, airline-boarding passes, parking receipts, etc., must be submitted with your reimbursement request. When attending a conference that requires air travel, you must work with staff at The Computer Center to make your travel arrangements. This will ensure that all of your travel plans meet the University of Utah travel guidelines. UAAACT members who make their own air travel arrangements that do not meet the University of Utah travel guidelines may be responsible for paying for their airline ticket.

Given the need to conserve financial resources, it is imperative that project money for training/travel be utilized wisely. Based on that premise, it is expected that room and transportation costs will be shared by team members whenever possible. If a UAAACT member chooses to room alone or with someone other than another UAAACT member, only one-half of the room rate would be paid through the project. Travel mileage to training events will usually be fully reimbursed if two or more UAAACT team members travel together in one automobile. However, if a member chooses to travel alone, reimbursement would be at only one-half of the mileage rate. The leadership council may approve specific exceptions to this policy based on special needs and circumstances.

Occasionally UAAACT members attending training events choose to arrive a day or two before the training begins and remain a day or two after training has ended. Unless the extended stay is required for safety reasons, or to reduce airfare costs, the UAAACT member will be required to personally pay expenses incurred because of the extended stay. The UAAACT project will not pay expenses that are not specifically related to training. If UAAACT members register for a conference and cancel for reasons other than a medical or family emergency, they may be held personally responsible for expenses incurred.

If UAAACT members want to be reimbursed for car rental while attending a UAAACT approved conference, they should request that approval along with their request to attend the conference

UAAACT project money budgeted for training/travel but unused during a budget year may be made available for the purchase of needed equipment. The leadership council will be responsible for decisions regarding the allocation of such funds.

As a general rule, UAAACT members who live 50 miles or more from the UAAACT conference hotel will have their hotel room covered (based on double occupancy) by the UAAACT project. UAAACT members who stay for the UAAACT dinner on Thursday evening may be eligible to have the UAAACT project cover a Thursday night hotel stay because of safety issues.

Documentation of UAAACT Competencies

Grandfather Policy - The UAAACT Leadership Council feels that years of service as well as specific assistive technology training could qualify current UAAACT members for Level 1, Level 2, or Level 3 competencies. All requests should be submitted in writing by May 8, 2003 to the UAAACT Leadership Council, c/o Craig Boogaard, 1595 West 500 South, Salt Lake City, UT 84104 or by email to: cboogaar@utah.gov

Years of Service – Two or more years of service on a UAAACT team (or other assistive technology assessment team) with a letter of justification to the Leadership Council indicating experience in assistive technology service, training, and skills. In the letter, indicate the level of competency you feel is appropriate for your skill level as indicated by the competency levels described on the form "Documentation of UAAACT Competencies."

Training - Submit documentation of ATP (RESNA) Certification, NASDSE Certification, or other University assistive technology degree or equivalent certification to the Leadership Council for Level 3 UAAACT Competency certificate.

If you do not qualify based on years of service or training but feel you have significant skills in conducting assistive technology assessments, submit a letter of justification to the UAAACT Leadership Council describing the competency level you feel is appropriate and your request will be considered.

Re-certification is required every five years. Through licensure points (i.e. attend or present at UAAACT Conferences and workshops, local workshops, CTG, CSUN, ATIA, AAC in the Mountains, etc.), UAAACT members should earn 50 licensure points related to assistive technology to be re-certified.

Team members who leave the UAAACT team and return - at what competency level should they be when they return?

If they return within one year, they will retain their previous competency level. If they are off the team for more than one year, they will move down one competency level for each year they were off the team.
